

3" Power Dock

ergoCentric®

3" Power Dock; always ready to power your work day.

The 3" **grommet power and pop-up dock** can be used anywhere that needs easy access to AC power and a 5V USB charger.

Simply bore a 3" hole for installation or replace a 3" grommet with any of the Dock-200 Series. The simple touch of a fingertip will release the spring-loaded lid of the 3" grommet and it will gently open to reveal an AC outlet and USB charger.
