

# 5 features to look for in a height adjustable table

Height adjustable tables have become a popular choice in today's workspaces. With so many brands and options to choose from, finding a table that satisfies your clients' needs can be challenging – we are here to help!

## 5 features to look for in a height adjustable table:

### ① Ability to retrofit existing work surfaces:

The sturdy upCentric™ frame accommodates a variety of different tabletop sizes to make converting existing work surfaces into height adjustable tables a very economical way of obtaining a sit-to-stand solution.

### ② Maximum height range:

With 26" of height adjustability, the upCentric offers the maximum height range meeting BIFMA-G1-2013 Standards.

### ③ Quick and easy installation:

upCentric installation is fast and simple and can be done in less than 15 minutes. Written and video assembly instructions are available.

### ④ Dual motors:

Dual motors ensure a smooth and quiet transition from seated to standing positions. The upCentric features motors made by TiMOTION, specifically designed for ergonomic height adjustable tables.

### ⑤ Energy efficiency:

The upCentric features a low maximum power draw of just 30W while transitioning in positions.

After 30 seconds of inactivity, the upCentric enters Sleep Mode reducing energy consumption to just 0.06W of power.
