

# ergoCentric<sup>®</sup> Footring

ergoCentric

# The ergoCentric Footring; reduce workplace fatigue.

Footrings support the user's legs for various height requirements so that problems including fatigue, poor posture and decreased circulation can be avoided. The **ergoCentric Footring** can be easily adjusted without a tightening knob. Simply turn the footring counter-clockwise to loosen, move the footring to the desired location and turn it clockwise to tighten.
