FOR IMMEDIATE RELEASE

ergoCentric launches airCentric 2, celebrates airCentric task chair's 10th anniversary

Mississauga, Ontario—April 29, 2019—ergoCentric, the market leader in ergonomically correct task seating, height adjustable tables, and ergonomic office accessories, has introduced the [airCentric 2](#). With upgraded performance features, the airCentric 2 offers improved comfort and an enhanced aesthetic.

Inspired by the breathability of mesh task chairs, the airCentric 2 combines the airflow inherent in a mesh chair with the proven ergonomics of ergoCentric's foam and fabric seating. In addition to offering a truly comfortable seating experience, the airCentric 2's many important features include:

- Patented Airflow technology
- 5" of infinite back height adjustment
- Optional air lumbar
- New molded back foam cushion that allows for improved comfort of the air lumbar option
- Optional patented adjustable headrest with three pivot points and seven inch vertical and horizontal adjustments
- Optional solid back cap for environments with stringent cleaning requirements
- The patent-pending tCentric armrest, available in four combinations of vertical, lateral and patented 360° swivel adjustments

"We're excited to celebrate the airCentric's tenth anniversary with the launch of our airCentric 2," said Terry Cassaday, Owner and Founder of ergoCentric. "Our goal was to improve the chair's optional air lumbar support and its aesthetic, while also recognizing the importance of continuing to deliver the benefit of airflow and demonstrated ergonomic support."

With over 100,000 chairs sold, the [airCentric](#) is able to fulfill the needs of both general office and accommodation seating requirements.
